PROFILE

I am a proactive, self-taught person committed to continuous learning. Throughout my professional career, I have developed both technical and soft skills through formal and independent experiences.
I specialize in both frontend and backend web development, and I have supplemented my knowledge with personal projects and the use of online resources.
My focus is on problem-solving, adaptability to new challenges, and efficient collaboration in multidisciplinary teams.
I seek to contribute to the success of an organization with my ability to quickly acquire new skills and apply innovative solutions.

WORK EXPERIENCE

BATERIAS WILLARD | 2022 – 2024
Assistant Software Development Engineer

I designed and developed external web application modules for the company using Angular for the front-end and Node.js with Express for the back-end, implementing scalable and efficient architectures.

Tasks:
- Consumption of API endpoints using Angular
- Changes in the designs of Angular web applications
- Development of endpoints from the Node.js and TypeScript API
- Querying in MySQL and DB2 databases
- Cron Jobs using Node.js and MongoDB
- Pushing changes from the testing environment and pulling them from the production environment using Git
- Development of web applications both in JavaScript and PHP internally, and Node.js with Angular for external applications.
- Technical support.

BATERIAS WILLARD | 2021 – 2022
Practicing Software Development Engineer

During my internship, I worked on the development of several internal modules for the company's intranet using JavaScript, Php, Jquery, Ajax, and Db2, which allowed me to gain practical experience in developing web solutions integrated with databases.

Tasks:
- Querying in the Db2 database.
- Changes in the designs of web applications using JavaScript and Bootstrap.
- Changes in the functions of web applications using Php and Db2.
- Development of web applications using PHP, JavaScript, and DB2.
- Pushing changes from the testing environment using Git.
- Technical support.
